

## About this Document

This document correlates MAP® sub-goals and RIT ranges to Khan Academy® exercises. The Khan exercises are interactive problems for students with instant feedback:

**Geometry**  
**RIT Range: 192 - 203**  
[Categorize quadrilaterals](#)

**Categorize quadrilaterals** Get 5 correct in a row ✓✓✓✓✓

Which of these shapes are quadrilaterals but not squares?

Select all that apply.

Answer  
Select all the correct answers

Check Answer

Khan Academy exercises teach through interactive problems

Having these exercises correlated to RIT ranges means you can use them in conjunction with your flexible student groupings that are also informed by RIT score results. The exercises are also useful for targeting learning in each student's zone of proximal development (Vygotsky).

The correlation between MAP RIT scores and the Khan Academy exercises was determined by using our 2011 norms data to approximate grade levels, which were then matched to the corresponding Common Core State Standards (CCSS). Teachers in states that have not adopted the CCSS may still find these resources valuable by relating goals or sub-goals that are similar to CCSS goals and sub-goals.

NWEA plans to work with Khan Academy to update these links twice a year as new exercises are developed.

## How to Use

1. Use MAP reports to find the RIT scores for a given sub-goal.
2. In this document, locate that same goal, approximate RIT range, and sub-goals.
3. To choose appropriate Khan Academy exercises:
  - a. Consider both the name of the exercise and the CCSS standard.
  - b. Click the link and try the exercise yourself.  
 Note: When you're in Khan Academy, the links to videos and other resources add context to the actual exercise but are not necessarily correlated to MAP.
4. In the browser window where the exercise opened, note or copy the Web address URL.
5. Optionally deliver exercises to students. For example:
  - Paste the URL into an online document for students to access.
  - Present the exercise in the classroom.
  - Use for parent-teacher conference discussion.

## Limitations

The instructional suggestions presented in this document are intended to provide supplementary resources based on available Khan Academy exercises and are not intended to replace other options. MAP/MPG data should be used as one of many data points for instructional decisions rather than as a placement guide.

## Terms of Use

These Terms of Use permit you to use this document for your personal, non-commercial use only. You must not reproduce, distribute, modify, create derivative works of, publicly display, publicly perform, republish, download, store or transmit any of the material on this document, except you may print or download one copy of a reasonable number of pages of this document for your own personal, non-commercial use and not for further reproduction, publication or distribution. ### Standards Alignment

#### RIT Range: 161-178

Practice identifying circles, triangles, squares, rectangles, rhombuses, trapezoids, and hexagons. 1.G.A.1

Compare the lengths of 2 objects indirectly by using a third object. 1.MD.A.1

Measure objects with same-size length units without gaps or overlaps. 1.MD.A.2

Practice ordering 3 objects by length. 1.MD.A.1

#### RIT Range: 179-191

Estimating lengths 2.MD.A.3

#### RIT Range: 179-191

Add and subtract lengths to solve word problems. 2.MD.B.5

Measure objects using a ruler. 2.MD.A.1

Practice identifying quadrilaterals, pentagons, hexagons, and octagons. 2.G.A.1

#### RIT Range: 192 - 203

Decompose shapes to find area 3.MD.C.7

Finding area by multiplying 3.MD.C.7

#### RIT Range: 192-202

Comparing areas by multiplying 3.MD.C.7b

#### RIT Range: 192-202

Compare the areas and perimeters of rectangles when given a context or picture. 3.MD.D.8

Practice estimating the mass of real life objects using grams and kilograms. 3.MD.A.2

Practice estimating the volume of real life objects using milliliters and liters. 3.MD.A.2

Find a missing side length for a figure when given the perimeter. 3.MD.D.8

Practice finding the area of rectangles by counting unit square. Create rectangles with a given area by covering unit squares. 3.MD.C.6

Solve word problems involving mass. Estimate the mass of items. 3.MD.A.2

Practice measuring side lengths to find perimeter. 3.MD.D.8

Count unit squares and partial unit squares to find the area of shapes. 3.MD.C.6

Calculate the perimeter of a shape from its side lengths. 3.MD.D.8

## Geometry

### Geometric Measurement and Relationships

#### Standards Alignment

#### RIT Range: > 231

Write the equation for a line that is a parallel or perpendicular to a line given in slope-intercept form and goes through a specific point.

HSG-GPE.B.5

## Operations and Algebraic Thinking

### Expressions and Equations

#### Standards Alignment

#### RIT Range: < 160

Practice adding by "putting together" (with numbers less than 10).

K.OA.A.1

Practice subtracting by "taking apart" (with numbers less than 10).

K.OA.A.1

#### RIT Range: 161-178

Practice adding 3 numbers. All numbers in these problems are 20 or less.

1.OA.A.2

Practice adding and subtracting to solve word problems. Numbers used are 20 or less.

1.OA.A.1

Practice solving more challenging word problems with addition and subtraction. Numbers used are 20 or less.

1.OA.A.1

Practice solving word problems by finding how many more (or fewer) objects there are. Numbers used are 20 or less.

1.OA.A.1

Practice solving more word problems by finding how many more (or fewer) objects there are. Numbers used are 20 or less.

1.OA.A.1

Learn how to solve problems like " $\_\_\_\_ - 7 = 18$ " where you don't know one of the values in an addition or subtraction equation.

1.OA.D.8

Practice seeing how addition and subtraction are related.

1.OA.B.4

#### RIT Range: 179-191

Practice adding and subtracting to solve word problems. These questions are result unknown or change unknown problems. Numbers used are 100 or less.

2.OA.A.1

Practice solving word problems with addition and subtraction. These questions are comparison problems including difference unknown, smaller value unknown, and bigger value unknown. Numbers used are 100 or less.

2.OA.A.1

Practice solving word problems with addition and subtraction. These questions are start unknown problems including add to and take from problems. Numbers used are 100 or less.

2.OA.A.1

Practice solving more challenging addition and subtraction word problems 2.OA.A.1

with "more" and "fewer". Multi-step problems are also included.

Numbers used are 100 or less.

Practice solving problems like " $\underline{\quad} - 45 = 27$ " where you have to figure out 2.OA.A.1

the missing value in an addition or subtraction equation.

# Operations and Algebraic Thinking

## Expressions and Equations

### Standards Alignment

#### RIT Range: 179-191

<u>Add and subtract lengths to solve word problems.</u>	2.OA.A.1
<u>Practice adding 2-digit numbers like <math>43+27</math> that have sums that are multiples of 10.</u>	2.NBT.B.5
<u>Practice adding two-digit numbers by making groups of ten.</u>	2.NBT.B.5
<u>Read and interpret picture graphs.</u>	2.OA.A.1

#### RIT Range: 192-202

<u>Addition using groups of 10 and 100</u>	3.NBT.A.2
--	-----------

#### RIT Range: 192-202

<u>Practice changing the grouping of factors in multiplication problems and see how it affects the product.</u>	3.OA.B.5
<u>Practice changing the order of factors in a multiplication problem and see how it affects the product.</u>	3.OA.B.5
<u>Divide two numbers. Quotients are equal to or less than 10.</u>	3.OA.A.4
<u>Practice solving for unknown letters and symbols in equations.</u>	3.OA.B.6
<u>See the relationship between multiplication and division problems.</u>	3.OA.B.6
<u>Find both the multiplication and division equation that can be used to solve a word problem.</u>	3.OA.B.6
<u>Solve two-step word problems with addition, subtraction, multiplication, and division. Some questions include estimation.</u>	3.OA.D.8

#### RIT Range: 204 - 212

<u>Comparing with multiplication</u>	4.OA.A.1
--------------------------------------	----------

#### RIT Range: 203-212

<u>Practice solving multiplication and division word problems. Some problems have remainders.</u>	4.OA.A.2
<u>Multiply 2- or 3-digit numbers by 1-digit numbers. No regrouping.</u>	4.NBT.B.5
<u>Multiply 3- or 4-digit numbers by 1-digit numbers. Regrouping (carrying) needed.</u>	4.NBT.B.5
<u>Multiply 2-digit numbers by 2-digit numbers. Regrouping (carrying) needed.</u>	4.NBT.B.5
<u>Multiply a 1-digit number by a multi-digit number by decomposing the multi-digit number.</u>	4.NBT.B.5
<u>Use an area model to decompose factors and multiply.</u>	4.NBT.B.5

## Operations and Algebraic Thinking

### Expressions and Equations

### Standards Alignment

#### RIT Range: 203-212

Use an area model to decompose the larger factor and multiply. 4.NBT.B.5

#### RIT Range: 213-219

Practice creating expressions with parentheses from real-world contexts. 5.OA.A.2

Solve multi-step expressions with parentheses. Place parentheses in an expression to make the expression equivalent to a given number. 5.OA.A.1

Solve and interpret fraction multiplication word problems. 5.NF.B.6

Practice evaluating powers of ten. 5.NBT.A.2

Practice changing expressions from words to math. 5.OA.A.2

Give the number of tens a number is being multiplied or divided by when the decimal is moved to the left or right. 5.NBT.A.2

#### RIT Range: 220-223

Simplify algebraic expressions by combining like terms. 6.EE.A.3

Practice expanding expressions using the distributive property then combining like terms. 6.EE.A.3

Practice figuring out if a variable is dependent or independent. 6.EE.C.9

Practice applying the distributive property to algebraic expressions. 6.EE.A.3

Practice writing basic equations to model real-world situations. 6.EE.B.6 | 6.EE.B.7

Practice determining whether or not two algebraic expressions are equivalent by manipulating the expressions. These problems require you to combine like terms and apply the distributive property. 6.EE.A.3

Practice plugging in values to evaluate real-world algebraic expressions. These are introductory problems, so the expressions aren't too complicated. 6.EE.A.2

Practice solving more challenging problems using the order of operations. 6.EE.A.1

Practice spotting the mistake in someone else's work as they attempt to solve one-step equations. 6.EE.B.7

Create number line graphs of inequalities. 6.EE.B.8

Practice writing inequalities with variables to describe real-world situations. 6.EE.B.6 | 6.EE.B.8

Practice solving equations in one step by multiplying or dividing a value from both sides.

6.EE.B.7 | HSA-REI.B.3

Practice solving equations in one step by adding or subtracting the same value from both sides.

6.EE.B.7 | HSA-REI.B.3

Practice solving equations in one step by adding or subtracting a number from both sides. These problems involve decimals and fractions.

6.EE.B.7

# Operations and Algebraic Thinking

## Expressions and Equations

### Standards Alignment

#### RIT Range: 220-223

Practice solving equations in one step by multiplying or dividing a number from both sides. These problems involve decimals and fractions. 6.EE.B.7

Practice taking exponents of whole numbers. All exponents in these problems are either positive or zero. 6.EE.A.1

Practice evaluating exponents that have fractional bases. 6.EE.A.1

Practice plugging in values to equations and checking to see if the equations hold true. 6.EE.B.5

Practice plugging in values to inequalities and checking to see if the inequalities hold true. 6.EE.B.8

Practice writing algebraic expressions to match verbal descriptions of mathematical operations. 6.EE.A.2

Practice writing slightly more complex algebraic expressions to model real-world situations. 6.EE.A.2

Practice writing basic algebraic expressions to match verbal descriptions of mathematical operations. 6.EE.A.2

Practice writing basic algebraic expressions to model real-world situations. 6.EE.A.2

#### RIT Range: 224-227

Simplify algebraic expressions by combining like terms. Coefficients on some terms are negative. 7.EE.A.1

Practice combining like terms using the distributive property. These problems involve adding and subtracting negative numbers. 7.EE.A.1

Practice solving word problems involving price discounts, taxes, and tip calculations. 7.EE.B.3

Practice figuring out which expressions are equivalent by applying your knowledge of negative numbers and the distributive property. 7.EE.A.1

Factor expressions like  $3x-9$  by applying the distributive property. (All expressions in this exercise are linear binomials.) 7.EE.A.1

Practice interpreting linear expressions 7.EE.A.2

Practice solving equations that take two steps to solve. 7.EE.B.4 | HSA-REI.B.3

Practice writing equations to model real-world situations, then solve the equations to answer interesting questions about the situations. 7.EE.B.4

Practice combining like terms for expressions that have rational coefficients. This requires adding and subtracting fractions. 7.EE.A.1

Practice solving word problems involving price markups and commission fees. 7.EE.B.3

Practice solving multi-step word problems. The numbers in these problems may be fractions, decimals, and percents. 7.EE.B.3

# Operations and Algebraic Thinking

## Expressions and Equations

## Standards Alignment

### RIT Range: 224-227

Practice solving equations that take two steps to solve. These problems involve arithmetic with fractions and decimals. 7.EE.B.4

### RIT Range: 228-230

Given two numbers in scientific notation, practice adding and subtracting them. 8.EE.A.4

Solve age word problems with a system of equations. 8.EE.C.8

Practice comparing two real-world quantities by approximating them with powers of 10. 8.EE.A.3

A variety of questions about rates and proportional relationships involving graphs, tables, and equations. 8.EE.B.5

Given a linear equation with missing values, determine appropriate values in order to have one, zero, or infinite solutions. 8.EE.C.7

Practice solving more challenging problems involving scientific notation. 8.EE.A.4

Determine the number of solutions of a given system of equations by considering its algebraic solution process. 8.EE.C.8 | HSA-SSE.B.3

Practice finding the cube root of a perfect cube positive integer. 8.EE.A.2

Practice solving equations by squaring or cubing both sides. 8.EE.A.2

Practice evaluating expressions by adding, subtracting, or multiplying exponents. 8.EE.A.1

Practice computing numbers raised to positive and negative exponents. Bases may be fractions. 8.EE.A.1

Find the graph of a linear equation given in standard form. 8.EE.C.7 | HSA-REI.D.10

Determine the number of solutions of a given system of equations by considering its graph. 8.EE.C.8 | HSA-REI.D.10 | HSA-REI.D.11

Graph a system of equations in slope-intercept or standard form, and find their solution using the graphs. 8.EE.C.8 | HSA-REI.C.6 | HSA-REI.D.10 | HSA-REI.D.11

Graphing proportional relationships 8.EE.B.5

Given the x or y value of a 2-variable equation solution, find the value for the other variable in the solution. 8.EE.C.7 | HSA-REI.B.3 | HSA-REI.D.10

Practice solving one-variable equations like  $20 - 7x = 6x - 6$ , where the variable appears on both sides of the equals sign. 8.EE.C.7 | HSA-REI.B.3

[Practice solving problems using your knowledge of square and cube roots.](#) 8.EE.A.2

[Practice expressing products and quotients in scientific notation.](#) 8.EE.A.4

[Practice solving equations with parentheses using the distributive property.](#) 8.EE.C.7 | HSA-REI.B.3

[Solve linear equations that contain expressions with parentheses and the coefficients are rational numbers.](#) 8.EE.C.7 | HSA-REI.B.3

## Statistics and Probability

### Interpreting Categorical and Quantitative Data

### Standards Alignment

#### RIT Range: 203-212

Create and interpret dot plots using data with fractions. Fraction operations include addition and subtraction.

4.MD.B.4

#### RIT Range: 213-219

Interpret fraction data on dot plots to solve word problems.

5.MD.B.2

#### RIT Range: 220-223

Practice reading information presented in box plots.

6.SP.A.2 | 6.SP.A.3 | 6.SP.B.4 | 6.SP.B.5

Practice reading basic dot plots and frequency tables.

6.SP.B.4

More practice making box plots to summarize data sets.

6.SP.B.4

Practice computing the mean of data sets presented in a variety of formats, such as frequency tables and dot plots.

6.SP.B.4

Practice some nifty new vocab for describing data distributions.

6.SP.A.2

Practice interpreting and comparing dot plots, histograms, and box plots.

6.SP.B.4

Practice creating dot plots. Dot plots are very similar to frequency tables, but they make it easier to see the data.

6.SP.B.4

Practice creating frequency tables from small data sets.

6.SP.B.4

Practice creating histograms.

6.SP.B.4

Practice figuring out how the mean and median are affected when a data point is added to, taken from, or shifted within a data set.

6.SP.A.3

Practice understanding the meaning of quartiles of data sets.

6.SP.B.4

Practice reading histograms.

6.SP.B.4

Practice explaining the shapes of data distributions. Some distributions are symmetrical, perfectly balanced on the left and right. Other distributions are unbalanced. We say they are "skewed" and have "tails."

6.SP.A.2

Practice spotting the difference between statistical and non-statistical questions.

6.SP.A.1

#### RIT Range: 224-227

Practice comparing distributions that are presented in dot plots, histograms, and box plots.

7.SP.B.3 | 7.SP.B.4

**RIT Range: 228-230**

Practice plotting points to construct a scatter plot.

8.SP.A.1

Practice estimating the equation of a line of best fit through data points in a scatter plot. Then, use the equation to make a prediction.

8.SP.A.3

## Statistics and Probability

### Interpreting Categorical and Quantitative Data

### Standards Alignment

#### RIT Range: 228-230

- [Do you understand how two-way tables really work? Here's your chance to practice. Go get 'em! You got this!](#) 8.SP.A.4

- [Given a scatter plot, can you estimate the slope of the line of best fit that goes through the data points?](#) 8.SP.A.3 | HSS-ID.B.6 | HSS-ID.C.7
- [A good scatter plot has the independent variable on the x-axis and the dependent variable on the y-axis. Also, the scale of both axes should be reasonable, making the data as easy to read as possible. In these practice problems, we practice telling good s](#) 8.SP.A.1
- [Given a random assortment of points, draw a line of best fit through them.](#) 8.SP.A.2 | HSS-ID.B.6
- [Practice identifying the types of correlations shown in scatter plots. Sometimes we see linear correlations \(positive or negative\), sometimes we see non-linear correlations \(the data seems to follow a curve\), and other times we don't see any correlation a](#) 8.SP.A.1
- [Practice interpreting two-way frequency tables. For example, what does the cell in the top left tell you?](#) 8.SP.A.4
- [Practice interpreting two-way relative frequency tables](#) 8.SP.A.4
- [Given a Venn diagram or information about a relationship, create a two-way frequency table.](#) 8.SP.A.4
- [Practice creating two-way relative frequency tables from a two-way frequency table.](#) 8.SP.A.4

#### RIT Range: > 231

- [Match correlation coefficients to scatterplots to build a deeper intuition behind correlation coefficients.](#) HSS-ID.C.8
- [Practice applying the 68-95-99.7 empirical rule.](#) HSS-ID.A.4
- [Determine if a quadratic or exponential model fits a data set better, then use the model to make a prediction.](#) HSS-ID.B.6
- [Take a look at two different data distributions and draw some comparisons.](#) HSS-ID.A.1 | HSS-ID.A.2 | HSS-ID.A.3
- [Given a scatter plot, can you estimate the slope of the line of best fit that goes through the data points?](#) 8.SP.A.3 | HSS-ID.B.6 | HSS-ID.C.7
- [Given a random assortment of points, draw a line of best fit through them.](#) 8.SP.A.2 | HSS-ID.B.6

Calculate the standard deviation of a population.

HSS-ID.A.2

Analyze categorical data to find some trends.

HSS-ID.B.5

Determines if a statistical study is a sample study, an experiment, or an observational study.

HSS-ID.C.9

---

## Statistics and Probability

### Interpreting Categorical and Quantitative Data

#### Standards Alignment

#### RIT Range: > 231

Find the z-score of a particular measurement given the mean and standard deviation. HSS-ID.A.4

Use a z-table to find the probability of a particular measurement. HSS-ID.A.4

Use a z-table to find the probability that a particular measurement is in a range. HSS-ID.A.4

## Statistics and Probability

### Using Sampling and Probability to Make Decisions

#### Standards Alignment

#### RIT Range: 224-227

Practice using sample space diagrams to find probabilities. 7.SP.C.8

Practice making reasonable estimates of the likelihood of future events based on past experience. 7.SP.C.6

Practice counting possible outcomes in a variety of situations. These problems cover everything from counting the number of ways to get dressed in the morning to counting the number of ways to build a custom pizza. 7.SP.C.8

Given a random sample, practice figuring out what can we reasonably infer about the entire population? 7.SP.A.1

Practice finding probabilities of events, such as rolling dice, drawing marbles out of a bag, and spinning spinners. 7.SP.C.7

Practice creating probability models and understand what makes a valid probability model. 7.SP.C.7

Practice checking if sample space diagrams match a compound event. 7.SP.C.8

Practice expressing probabilities in different forms (fractions, decimals, and percents). 7.SP.C.5

Practice predicting the number of times a certain event will happen. 7.SP.C.7

Practice figuring out whether we took a random sample and whether we're able to draw valid conclusions from our data. 7.SP.A.1 | HSS-IC.A.1

#### RIT Range: > 231

Find four probabilities for each problem:  $P(A)$ ,  $P(B)$ ,  $P(A \text{ and } B)$ , and  $P(A \text{ or } B)$ . HSS-CP.B.7

The union, complement, and intersection of sets.

HSS-CP.A.1

Find dependent probabilities like  $P(A | B)$  or  $P(B | A)$  for a variety of contexts.

HSS-CP.B.6

Answer interesting questions about subsets of sample spaces.

HSS-CP.A.1

## Statistics and Probability

### Using Sampling and Probability to Make Decisions

#### Standards Alignment

#### RIT Range: > 231

Look at the results of different experiments, and determine if they are statistically significant.

HSS-IC.B.5

Show that you have mastery over the idea behind hypothesis testing by calculating some probabilities and drawing conclusions.

HSS-IC.A.2

Determine if two events are dependent or independent.

HSS-CP.A.2 | HSS-CP.A.3

Analyze categorical data to find some trends.

HSS-CP.A.4 | HSS-CP.A.5 | HSS-CP.B.6

Determines if a statistical study is a sample study, an experiment, or an observational study.

HSS-IC.B.3 | HSS-IC.B.6

Practice figuring out whether we took a random sample and whether we're able to draw valid conclusions from our data.

7.SP.A.1 | HSS-IC.A.1

## The Real and Complex Number Systems

### Extend and Use Properties

#### Standards Alignment

#### RIT Range: < 160

Practice counting which group has more objects.

K.CC.C.6

#### RIT Range: 161-178

Comparing two-digit numbers

1.NBT.B.3

#### RIT Range: 161-178

Practice grouping objects by tens.

1.NBT.B.2

Practice dividing shapes into 2 or 4 equal sections.

1.G.A.3

Practice breaking numbers apart into tens and ones.

1.NBT.B.2

#### RIT Range: 179-191

Practice more challenging problems comparing numbers within 1000.

2.NBT.A.4

Practice telling if shapes are divided into 2 or 4 equal sections.

2.G.A.3

Practice thinking about 3-digit numbers as hundreds, tens, and ones.

2.NBT.A.1

Practice breaking numbers into hundreds, tens, and ones.

2.NBT.A.3

#### RIT Range: 192 - 203

Fractions on the number line 1

3.NF.A.2

# The Real and Complex Number Systems

## Extend and Use Properties

## Standards Alignment

### RIT Range: 204 - 212

Prime numbers

4.OA.B.4

### RIT Range: 203-212

Practice rewriting fractions to have the same denominator.

4.NF.A.2

Practice comparing two fractions with different denominators with greater and less than symbols.

4.NF.A.2

Practice comparing fractions and mixed numbers that have unlike denominators.

4.NF.A.2

Use your place value skills to practice comparing whole numbers.

4.NBT.A.2

Compare multi-digit numbers that challenge your place value understanding

4.NBT.A.2

Sal arranges digits to make the largest or smallest possible number.

4.NBT.A.1

Practice using the same whole to find equivalent fractions.

4.NF.A.2

Practice dividing whole numbers by 10.

4.NBT.A.1

Practice making equivalent fractions by multiplying the numerator and denominator by the same number.

4.NF.A.1

Practice multiplying and dividing whole numbers by ten.

4.NBT.A.1

Practice multiplying whole numbers by 10.

4.NBT.A.1

Practice reading and writing numbers written in expanded form. Example:

4.NBT.A.2

The expanded form of 376 is  $300 + 70 + 6$ .

Practice working with whole numbers in written form. For example, "one thousand four hundred three" is the written form of 1403.

4.NBT.A.2

Practice ordering 3 fractions from least to greatest.

4.NF.A.2

Practice thinking about the value of each digit in a number.

4.NBT.A.2

Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right.

4.NBT.A.1

Practice problems to challenge your understanding of whole number place value

4.NBT.A.2

Practice finding equivalent fractions. These problems show you pictures of fractions to help you out.

4.NF.A.1

Practice comparing fractions by looking at pictures. Fractions in these problems do not have common denominators.

4.NF.A.2

### RIT Range: 213-219

Compare 2 numbers to thousandths based on meanings of the digits in each place.

5.NBT.A.1

# The Real and Complex Number Systems

## Extend and Use Properties

## Standards Alignment

### RIT Range: 213-219

<u>Graph and find the distance between point in first quadrant of coordinate plane.</u>	5.G.A.1
<u>Plot a given point on the coordinate plane.</u>	5.G.A.1
<u>Practice identifying place value names for decimal numbers. For example, the 3 in 4.563 is in the thousandths place.</u>	5.NBT.A.3
<u>Identify points in the first quadrant of a coordinate plane.</u>	5.G.A.1
<u>Practice evaluating powers of ten.</u>	5.NBT.A.2
<u>Give the number of tens a number is being multiplied or divided by when the decimal is moved to the left or right.</u>	5.NBT.A.2
<u>Practice understanding that the fraction bar really means division.</u>	5.NF.B.3
<u>Practice word problems that involve using the fraction bar as division.</u>	5.NF.B.3
<u>Practice identifying the value of one of the digits in a decimal number. For example, the 3 in 4.563 has a value of 0.003.</u>	5.NBT.A.1

### RIT Range: 220-223

<u>Practice finding the absolute value of a number, like -4 or 3.</u>	6.NS.C.7
<u>Practice understanding the meaning of absolute value in real-world scenarios.</u>	6.NS.C.7
<u>Write an inequality to compare absolute values.</u>	6.NS.C.7
<u>Practice more challenging comparison problems with absolute value.</u>	6.NS.C.7
<u>Practice solving word problems by interpreting the meaning of points plotted on an xy coordinate system.</u>	6.NS.C.6   6.NS.C.8
<u>Practice placing positive and negative decimal numbers on the number line.</u>	6.NS.C.6
<u>Practice placing positive and negative fractions and decimals on the number line.</u>	6.NS.C.6
<u>Practice graphing points and identifying which quadrants they're in.</u>	6.NS.C.6
<u>Practice plotting points like (-2, 4).</u>	6.NS.C.6
<u>Practice explaining the meaning of negative numbers in different scenarios.</u>	6.NS.C.5
<u>Identify positive and negative integers on the number line.</u>	6.NS.C.6

Practice more challenging problems where you identify positive and negative integers on a number line that doesn't have zero labeled.

6.NS.C.6

Practice finding the opposites of numbers. Numbers are opposites when they're on opposite sides of the number line the same distance from zero.

6.NS.C.6

Practice solving more challenging problems finding the opposites of numbers. Numbers are opposites when they're on opposite sides of the number line the same distance from zero.

6.NS.C.6

# The Real and Complex Number Systems

## Extend and Use Properties

## Standards Alignment

### RIT Range: 220-223

Practice putting positive and negative numbers in order. For example, -28, 12, -51, and 43.

6.NS.C.7

Practice putting positive and negative fractions and decimals in order. For example,  $-\frac{12}{4}$ , -2.5, and 3.25.

6.NS.C.7

Practice reflecting points across axes on the xy coordinate plane.

6.NS.C.6 | 6.NS.C.8

Practice finding the distance between two points on the coordinate plane that share the same x- or y-coordinate.

6.NS.C.6 | 6.NS.C.8

Practice comparing positive and negative numbers by thinking about their positions on the number line. Numbers to the right are greater than numbers to the left.

6.NS.C.7

Practice writing inequalities to describe real-world situations.

6.NS.C.7

### RIT Range: 228-230

Practice using a calculator to find the approximate decimal values of irrational numbers.

8.NS.A.2

Practice comparing irrational numbers without using a calculator.

8.NS.A.2

Practice finding the approximate value of square roots by thinking about perfect squares.

8.NS.A.2

Practice converting 1- and 2-digit repeating decimals to fractions.

8.NS.A.1

Practice converting multi-digit repeating decimals to fractions.

8.NS.A.1

Practice identifying whether numbers are rational or irrational.

8.NS.A.1

Practice finding the approximate value of square roots by thinking about perfect squares.

8.NS.A.2

Practice writing fractions as repeating decimals. Get ready to bust out those long division skills!

8.NS.A.1

### RIT Range: > 231

Practice simplifying expressions with multiple radical terms combined by addition, subtraction, multiplication, and/or division.

HSN-RN.A.2

Evaluate numerical expressions with rational exponents, and convert between equivalent forms of exponential and radical expressions.

HSN-RN.A.1 | HSN-RN.A.2

Evaluate numerical exponential expressions and simplify variable exponential expressions by using the properties of exponents.

HSN-RN.A.1 | HSN-RN.A.2

Evaluate numerical expressions and simplify variable expressions with mixed exponential and radical terms, by using the properties of exponents.

HSN-RN.A.1 | HSN-RN.A.2

Add, subtract, multiply, and divide square roots. For example, simplify  $\sqrt{50} - \sqrt{32}$ .

HSN-RN.A.2

## The Real and Complex Number Systems

### Extend and Use Properties

#### Standards Alignment

#### RIT Range: > 231

Determine whether an expression that is the combination of two rational/irrational numbers is rational or irrational itself.

HSN-RN.B.3

For example, simplify  $\sqrt[3]{18}$  as  $3\sqrt[3]{2}$ .

HSN-RN.A.2

Evaluate numerical radical expressions and simplify variable radical expressions by using the properties of exponents.

HSN-RN.A.1 | HSN-RN.A.2

Evaluate numerical expressions with unit-fraction exponents or radicals, and convert between the two forms of representations.

HSN-RN.A.1 | HSN-RN.A.2

#### RIT Range: 231 - 234

Properties of exponents

8.EE.A.1

## The Real and Complex Number Systems

### Perform Operations

#### Standards Alignment

#### RIT Range: < 160

Practice solving word problems by adding small numbers (numbers 10 or less).

K.OA.A.2

Practice counting by tens.

K.CC.A.1

Practice finding missing numbers in a list of numbers between 0 and 100.

K.CC.A.1

Practice solving word problems by subtracting small numbers (numbers 10 or less).

K.OA.A.2

#### RIT Range: 161-178

Practice solving problems like  $34+5$  and  $34+50$ .

1.NBT.C.4

Practice adding 3 numbers. All numbers in these problems are 20 or less.

1.OA.A.2

Practice adding. All numbers in these problems are 20 or less.

1.OA.C.6

Practice adding and subtracting to solve word problems. Numbers used are 20 or less.

1.OA.A.1

Practice solving more challenging word problems with addition and subtraction. Numbers used are 20 or less.

1.OA.A.1

Practice solving word problems by finding how many more (or fewer) objects there are. Numbers used are 20 or less.

1.OA.A.1

Practice solving more word problems by finding how many more (or fewer) objects there are. Numbers used are 20 or less.

1.OA.A.1

Practice solving problems like  $34+1$  and  $34+10$ .

1.NBT.C.4

Practice solving problems like  $24 + 45$ .

1.NBT.C.4

## The Real and Complex Number Systems
